"My kids love Zometool, it's intuitive and simple. It took them about 2 minutes to get totally into it". Joseph T., USA

BASICS

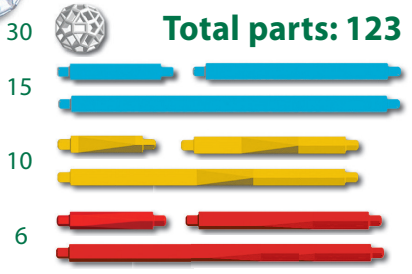

Zometool is the world's only multidimensional building toy.

It is loved by kids and used by Nobel Prize winners.

BASICS is your key to the Zometool universe.

Total parts: 123

Zometool was featured in TIME's: "Best of 2013: Toys that will make your kids smarter".

MADE IN USA
from kid-safe materials using wind-power. Guaranteed for life

7 09743 24900

CE **WARNING:** Choking Hazard
SMALL PARTS. NOT for children under 3 years.

The ZOMETOOL® rules

Thank you for using the Zometool! Please protect your investment and respect this magical tool: it's fun, powerful, enlightening, (expensive!) and you can break it.

Take it apart, don't break it apart. Squeeze balls off struts with your thumb and forefinger. You can practice using Zometool "lollipop." The ball will eject from the strut with no danger of damaging either.

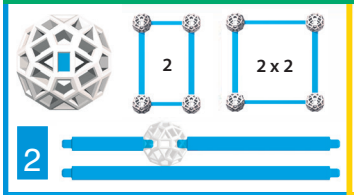

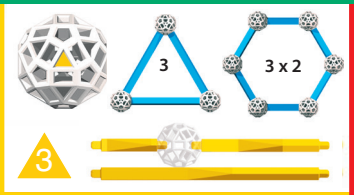

If it works, it works perfectly. The Zometool is mathematically precise. Although you may bend a strut to insert it in a tight spot, finished models are "stress-free:" no bending, twisting or fudging needed!
